

Important Notice Regarding the Use of Portable Battery Chargers

Thank you for your continued patronage of MIKASA RYOKAN.

In recent years, there have been reports of mobile batteries overheating, emitting smoke, and catching fire. To ensure everyone's peace of mind, we ask for your cooperation in the following points regarding their use in your guest room.

- Please refrain from charging your portable battery when you are away from your room.
- Please refrain from charging on flammable materials such as futon, sheets, curtains, and towels.
- While charging, please ensure the device remains in a visible location where you can monitor its condition at all times to prevent any potential issues.
- Please refrain from using mobile batteries that are damaged, swollen, or overheating.

Should any of the above situations be observed during housekeeping, our staff may move the battery to a safer location as a safety precaution.

We sincerely appreciate your understanding and cooperation.

General manager
